GODREJ AGROVET

QUICK PRIMER ON OIL PALM INDUSTRY IN INDIA

- Oil palm cultivation in India operates on a command area model
 - state governments allocate specific territories to companies
 - no territory overlaps, so no competition among companies in same area
 - company encourages farmers in its territory to cultivate oil palm
 - company provides interested farmers with oil palm nursery stock
- Oil palm is contract farming system, backed by State law
 - company in each territory is mandated to purchase entire production of fresh fruit bunches (FFB) from farmers
 - farmers must sell FFB to designated company in their territory
 - each company required to build palm oil mill in assigned territory to process FFB into crude palm oil (CPO)
- Pricing of FFB set by the State government
 - based on percentage of monthly benchmark imported CPO price
