ACKNOWLEDGEMENTS

MFIN is grateful to Members for their unflinching support and cooperation in providing very detailed and rich data in accurate and timely manner.

MFIN would also like to specially acknowledge the support provided by colleagues at MIX Market for their role in collection and collation of data.

EXECUTIVE SUMMARY

The Microfinance Sector in India today is on a path of steady growth and is in the middle of a financial services industry undergoing substantial change. Building on the regulatory support and the common-shared industry infrastructure (such as credit information system, publicly available industry information/data analytics and self-regulation among others), during financial year 14-15, the NBFC-MFI industry has shown strong growth and strengthened its position to provide much needed credit to under/un-banked populations in the country. Last year, NBFC-MFIs with a branch network of 9,894 and employee base of 75,085, provided credit to over 2.86 Cr clients with a loan outstanding of Rs 37,988 Cr.

The NBFC-MFIs industry, grew (yoy) by an impressive 64% in terms of gross loan portfolio (GLP) compared with last year. With a current portfolio of Rs 37,988 Cr, industry has grown at a CAGR of 44% since the crisis it faced in 2011-12. Moreover, growth in the industry has been wide-spread with MFIs of various sizes (small, medium and large) registering growth in different geographies. Besides the growth in GLP, industry has shown growth on all other critical indicators such as disbursements, productivity ratio, efficiency and balance sheet among others.

It is noteworthy that industry while achieving this growth has remained focused on serving economically active women entrepreneurs at the base of the pyramid who constitute 98% of the total industry client base. While average loan amount disbursed per account and average loan outstanding per client have been steadily increasing on a yoy basis (around 15%), MFIs, amongst regulated formal financial institutions, continue to provide the smallest size loans. Last year the average loan amount disbursed per account was Rs 16,317 and at the end of the financial year average loan outstanding per client was at Rs 13,262. A large majority (90%) of these small loans were given for enterprise purposes under the group lending model.

A key trend over the years has been improvement of resource utilization of MFIs in terms of branches, human resource, assets and equity. This year also, we see GLP per client and GLP per branch increasing by 33% and 45% respectively and higher portion of assets (77%) being deployed for creating loan portfolio. On expense side, with steady downward movement, operating expenses to GLP ratio is now at 10.3% at the industry level.

On the back of higher growth and improvements in the resource utilization, industry profits have improved. All except two MFIs showed positive margins during the FY 14-15 and one fourth MFIs have margin greater than 20%. While there are significant variations amongst MFIs in terms of RoA and RoE, on an average industry had an RoA of 2% and RoE of 10.5%.

Finally, portfolio quality has remained excellent with PAR 30 well under 1%.

INTRODUCTION

a. MFIN

Micro Finance Institutions Network (MFIN) is an association of Non-Bank Finance Company Micro Finance Institutions (NBFC-MFIs). Currently the association has 51 members, diverse in size and geographic spread, representing over 90% of the microfinance industry in India (excluding SHGs). MFIN works closely with regulators and other key stakeholders to achieve larger financial inclusion goals through microfinance.

MFIN's vision is to be an engine of inclusive growth for India and help provide financial services to 100 mn low income households by the year 2020, in a responsible and transparent manner, thereby helping them build sustainable livelihoods.

MFIN was established in October 2009 as the primary representative body of the NBFCs engaged in microfinance. Since its establishment, MFIN has spearheaded a range of initiatives that help meet the diverse and challenging needs of a rapidly evolving industry. It has been at the forefront of transformative work for the microfinance industry in area of policy advocacy and market development (business conduct, infrastructure, information/analysis, and best practices among others).

Knowledge and information based on relevant, accurate and timely data are edifice of MFIN's work in three core areas of Self-regulation, Advocacy and Development. And over the years, MFIN has taken a series of steps to contribute to enhanced body of information to guide market practices and support policy discourse. The **MicroScape**, our annual publication, is one critical product to support our efforts to bring greater transparency and accountability to the industry.

b. MicroScape

This is the fourth edition of the MicroScape, our annual publication that offers a comprehensive operational and financial data on the microfinance industry in a given financial year. Analysis presented in the MicroScape is based on data and Audited Financial Statements collected from the of MFIN member MFIs (NBFC-MFIs).

This edition of the MicroScape captures the important operational and financial trends in the industry for the FY 14-15 and compares key performance indicators for FY 14-15 with previous four previous financial years, FY 10-11, FY 11-12, FY 12-13 and FY 13-14.

NOTES

a. Data and methodology

- For FY 14-15, data and analysis is based on a cohort of 49 MFIs. However, there are variation in data sets for other years (FY 13-14, FY 12-13, FY 11-12, FY 10-11). Please refer to Annexures for year-wise panel of MFIs
- Data and ratios used for analysis is taken from Annual Data Collection Tool (ADCT) sent by MFIs
- Financial analysis is based on the Audited Financial Statements of MFIs for FY 10-11, FY 11-12, FY 12-13, FY 13-14 and FY 14-15
- Operational and portfolio quality data is self-reported
- Productivity ratios are weighted averages
- Financial ratios for various peer groups are based on simple averages of the individual ratios derived for each MFI, unless otherwise stated. This methodology has been employed to net-off the disproportionate impact of large MFIs, on the overall industry data
- Treatment of the financial statements is based on IFRS Standards
- CGAP standard definitions and formulae are used for all analyses. Refer to Annexures for details of all definitions and ratio used in the publication

b. Peer grouping

MFIs have been grouped based on their Gross Loan Portfolio (GLP) at the end of FY 14-15 (as of 31st March, 2015). On this basis, there are 20 MFIs with GLP < Rs 100 Cr, 14 MFIs with GLP > Rs 100-500 Cr and 15 MFIs with GLP > Rs 500 Cr. Complete list of MFIs under different peer groups can be seen in the Annexures

c. Exceptions and caveats

The following caveats apply to the analysis presented in this report:

- Data on rural/urban, socio-economic break-up and loan purpose does not include data from Bandhan and SKS
- Financial analysis does not include data from Bandhan, Muthoot Fincorp, Share, Spandana, and L&T Finance

PERFORMANCE

Post the Andhra Pradesh crisis¹, regulatory clarity and support provided by the Reserve Bank of India (RBI) along with industry initiatives (development of credit bureau eco-system, transparency, standards of business conduct and self-regulation among others) have considerably supported the microfinance industry in delivering much-needed micro-credit to the clients at low income population segments. And, growth and improvements within the industry, across indicators, clearly demonstrate this.

At the end of last financial year (FY 14-15, 31st March 2015), MFIN members NBFC-MFIs (MFIs) with a network of over 9,894 branches provided credit to over 2.8 Cr clients with GLP of Rs 37,988 Cr, a historic high for the industry. The industry Gross Loan Portfolio (GLP) grew by 64%. Portfolio quality remains extremely good with PAR levels well under 1%.

a. Outreach

During the last financial year, MFIs under various peer groups (based on GLP) registered positive growth across all outreach indicators. The clients grew by 12% to reach at 2.8 Cr, branches by 13% taking total count to 9,894 and employees by 23% taking total strength to 75,085.

¹ In October 2010, the situation of perceived overleveraging of microfinance clients in Andhra Pradesh lead to a strong policy response from the State government in the form of Andhra Pradesh Microfinance Institutions (Regulation of Moneylending) Ordinance 2010. This led to an acute crisis, within the microfinance industry, at a pan-India level

Employees are a critical asset for MFIs to ensure that credit can be extended to the clients in a manner that is transparent, efficient and appropriate to the needs of the clients. Of the total employee strength, share of the loan officers, who provide last mile connectivity in the delivery channel, is 65%. Loan officers are employed amongst the youth in local communities and thereby providing much needed training and employment to youth locally.

While 99% of the MFI clients are women, their share in work force (employee) is rather limited. Based on data collected for FY 14-15², women only account for 14% of total employee base. Employing women, particularly at a loan officer level, is quite challenging. Besides socio-economic and cultural factors in different geographies, nature of job which requires long travels in often remote rural/urban areas, odd working hours and risks of handling cash etc make employing women a challenge. However, some of the MFIs have been quite successful in employing a large number of women at different levels as under:

MFI	Female employees (%)	Female loan officers (%)
Sarvodaya Nano	69%	93%
Madura	67%	75%
Varam	66%	81%
Agora	65%	77%
Belstar	63%	88%
ESAF	53%	63%
Sambandh	36%	43%
IDF	28%	40%
Annapurna	23%	26%
Ujjivan	19%	24%

² Numbers do not include data from Bandhan, SKS and L & T Finance

b. Portfolio

During last year MFIs disbursed over 3.18 Cr loans worth Rs 51,841 Cr taking GLP of the MFIs at end of FY 14-15 (31st March 2015) to Rs 37,988 Cr, highest number ever reached by the industry.

MFIs, amongst regulated formal financial institutions, continue to provide the smallest size loans and continue to do so last year. Average loan amount disbursed per account and average loan outstanding per client have been steadily increasing at yoy growth of 15% and less.

Bandhan with GLP Rs 9,530 Cr is the largest NBFC-MFI, followed by SKS, Janalakshmi, Ujjivan and Equitas. It may be noted here that four (Janalakshmi, Ujjivan, Equitas and ESAF) of the top 10 NBFC-MFIs have got an 'in-principal' approval to convert to Small Finance Banks (SFBs).

Off-balance sheet portfolio is 12% of the industry portfolio amounting to Rs 4,486 Cr. At an industry level, this shows an increase of 24% over the last financial year. It may be noted that there has been much higher growth in off-balance sheet portfolio amongst small and medium MFIs.

Break-up of off-balance sheet portfolio for FY 14-15 shows that 85% is securitized. 12 MFIs have reported portfolios created under Business Correspondent (BC) partnerships, accounting for 12% of the off-balance sheet portfolio amounting to Rs 535 Cr

break-up of off-balance sheet portfolio (FY 14-15)

off-balance sheet portfolio (Rs, Cr)

Microfinance industry continues to focus on women in low-income group with disadvantaged socio-economic background in rural and urban areas. In the last few years, microfinance has been growing in the urban areas and it now accounts for 46%³ of loans. Share of loans in urban areas in the last year was 43%.

In terms of the lending model, group lending, mostly JLG continues to remain the predominant model to deliver credit services.

Over 90% are given as enterprise loans and remaining 10% loans are given for the purposes of household finance⁴.

³ Break-up of loans presented here for rural/urban does not factor data from SKS

⁴ Break-up of loans presented here for loan purpose does not include data from Bandhan, SKS and L & T Finance

c. Productivity and Efficiency

Key indicators of the productivity, 'clients and GLP per branch' and 'client and GLP per loan officer', have been steadily increasing in last few years. A typical loan officer caters to 585 clients and handles portfolio of Rs 78 Lakh.

Similarly, analysis of cost per loan ratio indicates that cost for acquiring and serving a customer is around Rs 1,000 wherein, larger MFIs have succeeded in achieving the economies of scale and reduce cost per loan to around Rs 900.

Analysis of OSS ratio of MFIs shows high efficiencies in MFIs industry. With an average OSS of 117% of the industry in FY 14-15, it is noteworthy that small MFIs too could manage an average OSS of 109% in FY 14-15

d. Financials⁵

Assets

Total assets have grown by 77.8% to reach Rs 29,464 Cr in FY 14-15. Analysis of assets shows that the proportion of Net Loan Portfolio (NLP) has stayed around 65% to 70% with gradual increase to 71% in FY 14-15. The decrease in relative proportion of cash and equivalents in the same year shows more efficient utilization of assets within the industry

ROA

MFIs with negative ROA have reduced substantially since FY 11-12. Also, it is noteworthy that 24 MFIs recorded more than 2% ROA. Average of the ratio for all MFIs is at an encouraging 2% and for large MFIs it is even larger, at 3.2%

⁵ Financial analysis does not include data from Bandhan, Muthoot Fincorp, Share, Spandana, and L&T Finance

Equity & Borrowing

Similarly, the decrease in proportion of equity in FY 14-15, as shown in the graph below with breakup of equity and liabilities shows that NBFC-MFIs in India are more leveraged. In FY 14-15 the equity increased by 73% to reach Rs 5,640 Cr.

ROE

Number of MFIs with negative ROE have reduced substantially since FY 11-12, and in FY 14-15 there were only 2 MFIs with negative ROE.

Borrowings

The outstanding borrowings available with the industry in FY 14-15 witnessed a growth of 83% to reach Rs 22,029 Cr. The proportion of borrowing in total liabilities of the industry has increased which shows that industry has succeeded in leveraging to a higher extent.

Debt equity ratio

Break up of debt equity ratio shows that large MFIs (GLP > Rs 500 Cr) have succeeded in leveraging, while smaller MFIs continue to struggle for debt funding in proportion to the equity available to them.

It may also be noted that medium MFIs (GLP Rs 100-500 Cr) have improved their debt equity ratio over the period and are now close to levels of large MFIs (GLP > Rs 500 Cr).

Income

Analysis of income statements of NBFC-MFIs shows that interest income from loan portfolio makes 82.1% of the total revenue of the NBFC-MFIs. Fees and commission is around 6%

Profit margin and yield on GLP

After the AP crisis around 38% of MFIs in FY 11-12 were into negative profit margins. The current status (FY 14-15) shows substantial recovery wherein just 2 of MFIs are with negative profit margins.

During the year in review, 27% member MFIs, could record more than 20% profit margins. It may also be noted that 66% member MFIs recorded more than 10% profit margin.

Yield on GLP figures before 2010 crisis, varied significantly, which are now closely equalized with regulations around the same. Large MFIs exhibited high yield before the crisis, which has shifted to lower range by FY 14-15.

Expenses

As shown in the graph below, the NBFC-MFIs operations have become more productive over the years reducing operating expenses to less than 50% in FY 14-15. The graph with breakup of expenses clearly depicts that the proportion of non-financial expenses in total expenses has reduced gradually over the years.

Expense to asset ratio

Expense to asset ratio has witnessed a decrease over the years as shown in the graph below. It may be noted that ratio for operating expense has reduced to 9% while the ratio for financial expense has seen a gradual increase.

Expense to loan portfolio

Further the graph below on operating expenses clearly shows the economies of scale that MFIs attain with increase in size. The ratio of operating expenses to loan portfolio for the industry was at an average of 10.3%, while the same for small MFIs was as high as 12.9%. The for large MFIs was at 8.5% in FY 14-15.

Similarly, ratio of personal expenses to loan portfolio for the industry was at an average of 6.4%, while the same for small MFIs was at 7.9% and large MFIs at 5.4% in FY 14-15

Portfolio at risk and write off ratio⁶

As of 31st March, 2015, PAR for NBFC-MFIs remain well under 0.5% of glp. Surge in PAR figures in FY 10-11 and FY 11-12 due to AP crisis was contained immediately by FY 12-13. Since then PAR figures have been reducing gradually. Analysis of PAR and write-off data shows the medium and large MFIs succeeds maintaining lower delinquencies.

⁶ Data excludes MFIs with substantial portfolio in AP during FY 10-11 AP crisis. This includes FFSL, SKS, Spandana and Share.

ANNEXURE

a. Definitions

Term	Definition
Total Assets	Includes all Assets as provided by audited financials
Offices	Number, including head office
Employee	Total number of staff members
Capital to asset ratio	Total Equity /Total Assets
Debt to equity	Total Liabilities / Total Equity
Portfolio to assets	Gross Loan Portfolio /Total Assets
Clients	Number of clients with loans outstanding as on date
Percent of women clients	Number of women clients /Number of clients
Number of loans outstanding	Number of loans outstanding as on date
Gross loan portfolio	Gross Loan Portfolio as on date, includes Net loan portfolio and Managed Portfolio
Average loan outstanding per client	Gross Loan Portfolio/Number of Active clients
Average outstanding balance	Gross Loan Portfolio / Number of Loans Outstanding
Return on assets	(Net Operating Income - Taxes) / Average Total Assets
Return on equity	(Net Operating Income - Taxes) / Average Total Equity
Operational self sufficiency	Financial Revenue / (Financial Expense + Impairment Losses on Loans + Operating Expense)
Financial Revenue/Assets	Financial Revenue / Average Total Assets
Profit margin	Net Operating Income / Financial Revenue
Yield on gross portfolio (nominal)	Financial Revenue from Loan Portfolio / Average Gross Loan Portfolio

Term	Definition
Total Expense/ Assets	$(\text{Financial Expense} + \text{Net Impairment Loss} + \text{Operating Expense}) / \text{Average Total Assets}$
Financial Expense/Assets	$\text{Financial Expense} / \text{Average Total Assets}$
Provision for Loan Impairment/ Assets	$\text{Impairment Losses on Loans} / \text{Average Total Assets}$
Operating Expense / Assets	$\text{Operating Expense} / \text{Average Total Assets}$
Personnel Expense/ Assets	$\text{Personnel Expense} / \text{Average Total Assets}$
Administrative Expense/ Assets	$\text{Administrative Expense} / \text{Average Total Assets}$
Adjustment Expense/ Assets	$(\text{Un Net Operating Income} - \text{Net Operating Income}) / \text{Average Total Assets}$
Operating Expense/ Loan Portfolio	$\text{Operating Expense} / \text{Average Gross Loan Portfolio}$
Personnel Expense/ Loan Portfolio	$\text{Personnel Expense} / \text{Average Gross Loan Portfolio}$
Cost per client	$\text{Operating Expense} / \text{Average Number of Active Borrowers}$
Cost per loan	$\text{Operating Expense} / \text{Average Number of Loans}$
Clients per employee	$\text{Number of Active Borrowers} / \text{Number of Personnel}$
Loans per employee	$\text{Number of Loans Outstanding} / \text{Number of Personnel}$
Clients per loan officer	$\text{Number of Active Borrowers} / \text{Number of Loan Officers}$
Loans per loan officer	$\text{Number of Loans Outstanding} / \text{Number of Loan Officers}$
Portfolio at Risk > 30 Days	$\text{Outstanding balance, portfolio overdue} > 30 \text{ Days} + \text{renegotiated portfolio} / \text{Gross Loan Portfolio}$
Portfolio at Risk > 90 Days	$\text{Outstanding balance, portfolio overdue} > 90 \text{ Days} + \text{renegotiated portfolio} / \text{Gross Loan Portfolio}$
Write-off Ratio	$\text{Value of loans written-off} / \text{Average Gross Loan Portfolio}$
Loan Loss Rate	$(\text{Write-off s} - \text{Value of Loans Recovered}) / \text{Average Gross Loan Portfolio}$
Loan Loss Rate	$(\text{Write-off s} - \text{Value of Loans Recovered}) / \text{Average Gross Loan Portfolio}$
